THE DISTANCE TO EQUAL IS LONG.

AND THE TIME IS SHORT.

HOW TO READ IT?

Global progress on SDG 5 is measured using 9 targets, made up of 18 indicators and sub-indicators, and is visualized according to an assessment of the current level of progress toward achieving the target.

○ One SDG 5 indicator value per country

■ Target met or almost met

■ Close to target

■ Moderate distance to target

■ Far from target

■ Very far from target

■ Insufficient data

Assessment of progress is indicated by the colour of the oval outline. The blurred effect is intended to communicate the interconnectedness of progress. Unless more is done by all, the entire global community will fail to achieve SDG 5.

Some SDG regions/countries have fewer indicators as not all indicators are applicable everywhere.

*Excluding Australia & New Zealand

- Close to target
- Moderate distance to target
- Far from target
- Very far from target

One oval = One SDG 5 indicator
 One group = One country or region

Assessment of progress is indicated by the colour of the oval outline. The blurred effect is intended to communicate the interconnectedness of progress. Unless more is done by all, the entire global community will fail to achieve SDG 5.

BOLD ACTION TO ACCELERATE PROGRESS
AND CLOSE DATA GAPS IS NEEDED.

THE TIME TO ACT IS NOW.
